

CNNH NEUROGENOMICS PROGRAM

NeuroGenomics is a new service provided by CNNH in order to more fully integrate genetic information into the care of patients with neurological and neurodevelopmental disorders.

→ "PEER-TO-PEER" PHYSICIAN REMOTE CONSULTATIONS

→ A patient's treating physician will consult with Dr. Boles via teleconferencing patient cases and genetic testing report(s). The emphasis is on actionable findings that might improve clinical management and patient outcomes.

→ *Focused* and *Standard* service levels discuss the official report(s) from genetic testing labs.

→ *Comprehensive* service level, in addition, re-analyzes raw exome data via proprietary software and Dr. Boles re-interprets looking primarily for potential treatment options.

→ No physician-patient relationship is provided by participation in this service; we provide you the information and advice to better manage your patient. This service is available anywhere in the USA. Each "peer-to-peer" discussion will be followed by a brief summary documenting the main points and an optional recording of the discussion.

→ We are an integrative group, and interpretation can include "Functional Medicine" considerations if desired. We base interpretation on science- or evidence-based information, and our clinical experience and expertise. The goal is to identify low-risk therapeutic options that are consistent with the patient's disorder and their genetic information.

→ TELEMEDICINE GENETICS CONSULTATIONS

→ Families can travel to our main office in Voorhees, New Jersey for a full consultation by Dr. Boles via telemedicine, regardless of their state of residence.

→ For families in FL, NJ, PA, and SC, the telemedicine consultation can take place directly to the family's home.

RICHARD G. BOLES, MD, PROGRAM DIRECTOR

Dr. Boles is an internationally recognized medical geneticist and a pediatrician. His expertise stems from decades of both clinical work and research at a major academic center as well as from his most recent experience in cutting edge biotechnology and genomics. He uses an innovative and integrative approach in both diagnosis and treatment to best serve his patients.

SPECIALTIES - DR BOLES

- Autism
- Other Neurodevelopmental Disorders
- Mitochondrial disease/dysfunction
- "Functional" disease, such as chronic fatigue syndrome, complicated migraine, cyclic vomiting, etc.

BILLING AND PAYMENT

These Services are not generally covered by insurance. Please contact our office for pricing and billing information. Your office can consider charging a portion to your patients to cover your time and effort during the peer-to-peer consult.

WHAT IS CNNH?

CNNH's innovative and integrative Specialty Care Medical Home® model of care provides diagnostic and treatment services for children, adolescents, and adults with neurological, neuropsychological, neuropsychiatric, behavioral, developmental, and learning concerns.
